

Nippon Signal: Participation in InnoTrans 2016

September 16, 2016

Nippon Signal will exhibit its highly-advanced railway safety technology at InnoTrans 2016 (International Trade Fair for Transport Technology - Innovative Components, Vehicles, and Railway System) which is the world's biggest international forum focusing on Railway Technology and to be held from September 20th to September 23rd at Berlin, Germany. Nippon Signal has participated in InnoTrans since 2010, and this is the fourth participation in the exhibition.

【Brief Description of InnoTrans】

InnoTrans is a world-renowned railway transport exhibition held every two years. The purpose of this exhibition is to show the newest products and technology and mutual understandings between the suppliers and users. The last exhibition was held in 2014, welcoming over 140,000 visitors from 146 countries. Considering the increase global railway demand, it is expected that more than 150,000 visitors would visit the 11th Exhibition this year. It is the great opportunity to expand the overseas market.

InnoTrans 2014 Nippon Signal Booth

【Nippon Signal Booth Project】

In our booth, we will introduce our wireless CBTC “SPARCS^{*1}” over the video on big-screen. Also for the first time in 2016 we will show the demonstration of SPARCS system by SPARCS Simulator. You can experience operating it with a realistic simulation. Explore the latest and highest technologies of our products, our pleasant sales executives and competent engineers are waiting for your visit.

SPARCS Simulator Image

*1: Abbreviation of **S**imple-structure and high-**P**erformance **A**TP by **R**adio **C**ommunication **S**ystem. It is the product name of our CBTC system. It uses the wireless communication to detect the train position and control train operation. It is the newest train control system in the world.
