2. Reason

We will conduct well-balanced growth investments and returns of profits to shareholders, while securing soundness of capital and financial strategies. We will strive for investments in R&D, the establishment of production systems, and the development of human resources, among others, with the aim of establishing a stable earning structure and management base from a long-term perspective, as well as strengthening our financial position. For shareholders, under a basic policy on appropriation of surplus of continuing stable dividends and implementing returns of profits based on performance, we have set immediate targets of a consolidated dividend payout ratio of 30% or higher and a lower-limit indicator DOE of 2.0% in principle.

Based on the above basic policy, the interim dividend for the fiscal year ended March 31, 2027 will be 17 yen per share, as originally planned. As a result, the annual dividend will be 56 yen per share, same as the previous fiscal year, and the consolidated dividend payout ratio will be 34.9%.
